

The daily management of critical safety elements is essential for avoiding costly and catastrophic incidents. RiskPoynt's industry leading solutions visualize the barrier health of assets to enable the proactive management of incident mitigation activities. RiskPoynt allows operators to test mitigation scenarios, enabling organizations to enhance safety while optimizing resource allocation to achieve operational excellence.

Key Capabilities

Easy to understand, Barrier Health Visualization tool (CRV).

Visualize Integrity, Gain Control, Operate Safely Any Time, Any Place.

Manage true risk and lower costs via an innovative SaaS-based application.

Based on Swiss Cheese Model of Accident Causation and Bow Tie Visualisation.

Proven Risk Assessment and Dynamic Barrier Management based on industry standards.

Advantages

- Better Resource Allocation: Prioritize flows based on highest risk exposure
- Standardization of processes: Site, regional, and global views that assure effective site and cross organization collaboration
- Regulatory Compliance: Enhanced regulatory reporting and industry compliance
- Creates Effective Safety Culture: enhanced risk mitigation improves workforce and environmental safety
- Increase Revenue and Decrease Costs: reduced planned and unplanned downtime, reduce loss of production, and avoid catastrophic loss
