

Unchain workers from the desks, complete more work, and streamline your data entry by empowering workers with a mobile solution that offers true integration with Oracle. Prometheus Mobile for Oracle is a complete maintenance and asset management mobile app, designed for the needs of Oracle users.

The solution offers full capabilities in both online and offline modes and works on iOS, Android, and Windows devices. Easily configured to your organization's unique needs and processes, Prometheus Mobile for Oracle is ready to go out-of-the-box, with implementations measured in days, not months.

## Key Capabilities

The three core modules of Prometheus Mobile for Oracle support the major functional areas of your eAM system: work management, asset management, and materials management.

### Mobile Work Management

Intuitive, graphical interface to create, update, process, and complete maintenance work orders and work requests.

### Mobile Asset Management

Access complete asset information, including failure and work order history, as well as schematics, checklists, safety bulletins, and other work information.

### Mobile Inventory Management

Complete mobile system for parts and materials management, including on-hand availability by storeroom.

## Advantages

- Designed for maintenance and ready to use right out-of-the-box
- Access to critical segments of your eAM system including work management, notification management, inventory management, and asset management
- Provides field access to detailed, step-by-step instructions, drawings, and asset history
- Optimize data entry and virtually eliminate errors and duplication
- Create and plan work orders at the point of failure, enhancing the efficiency and accuracy of your planning processes

*Prometheus solutions streamline workflow processes to eliminate redundancies and drive operational excellence.*
