STO Budgeting

Add-On for Prometheus STO Management Suite

PROMETHEUS GROUP

Gain more control and visibility into your shutdown, turnaround, and outage's budget the STO Budgeting add-on. Create long term plans, rough orders of magnitude (ROM), and definitive estimates easily within the STO budgeting module. Gain historical data on past turnarounds and perform comparisons on material, labor, and rental costs.

Generate Long Term Plans
Project a multi-year outlook for executive teams based on historical information.

Intelligently Calculate ROM during Scoping
Utilize a parameter-based model to calculate the rough order of magnitude for each discipline involved in a scoping item.

Produce Definitive Estimate
Form definitive estimates of costs, contractors, labor, and materials required for your turnaround.

Advantages

- Easily view all costs for labor, materials, and rentals in one spot

- Reduce the amount of clicks it takes to view and update information

- View cost trends between past and current turnarounds and outages

- Take snapshots to show budget trends over multiple years to communicate improvements

- Export your budget reports quickly to share with executive teams

- Enhance flexibility to update and view rate per work center, per year

- Eliminate misplaced and inaccurate spreadsheets
