

Fully Integrated with Your Existing Enterprise System

The Prometheus Contractor Management Productivity Suite has been specifically designed for enterprise users. It seamlessly integrates time and attendance recording, labor allocation, overtime management, leave management, fatigue management, contractor cost tracking, and advanced analytics with your ERP, EAM, or CMMS.

Key Capabilities

The Prometheus Contractor Management Productivity Suite uses four core modules to give you complete control and insight into productivity-related issues such as worker fatigue. The solution is available as an add-on for both Prometheus STO Planner and Prometheus Planning & Scheduling, and offers seamless integration with your EAM, ERP, or CMMS.

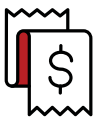

Contractor Management Time

Captures, validates, and manages employee time, attendance, and cost data in a single system.

Fatigue Management

Detailed labor reporting and analytics ensure leave time compliance with local, state, national, and union regulations.

Contractor Cost Tracking System

Captures, validates, and manages all time and cost data related to contractors, as well as streamlining review, approval, and payment processes.

Overtime Management

Provides overtime management and equalization by identifying the most suitable workers to cover open/non-scheduled shifts.

Advantages

- Fully integrated with your enterprise systems and other Prometheus Group products
- Accurate and easy to use
- Keeps your maintenance projects on-track and on-budget
- Manages complex overtime, shift assignments, and leave assignments
- Highlights worker fatigue issues
- Reduces data collection costs
- Mobile data entry client available
- Identifies fatigue problems in advance
- Easily configures display screens and business rules
