

Prometheus Weld-Console makes managing your welding projects easy by turning each stage of your project into simple daily instructions. The system allows you to import data, create weld mappings, check welding and WPS requirements, manage tasks, report progress and KPIs, and much more.

Weld-Console allows engineers, sub-contractors, and site and shop managers to view details of each project straight from their mobile devices.

Use the digital reporting feature to automatically generate reports on KPIs and backlog so you can assess the progress of your welding project.

Key Capabilities

Mobile App

Collects construction data, tracks real-time progress, and validates data inputs. Removes the need for paper and is accessible offline and online.

Maximize Quality

Helps minimize or eliminate errors as well as minimize administration and management costs. Ensures that projects comply with contracts and regulations.

Corrective Validation

Checks data in real-time, flags issues, and provides context to the issues. Logs and flags issues to ensure controlled release for the next step in the process to prevent rework.

Total Overview

Maximizes control, compliance, technical integrity, and project handover.

Reports

Provides users with welding maps and information about Welding Procedure Specifications (WPS), as well as automatically generating reports on various KPI types or To-Do lists

Advantages

Maximize Compliance: Ensures proper documentation is included throughout each stage of the project and that proper inspections are made before each turnover.

Validate Projects: Allows you to check and validate work before it reaches fabrication to reduce failure costs and delays.

Project Requirements: Provides easy checking on welding specifications and qualifications, torque and tension requirements, as well as tool certification and craft qualifications.

Flexible Solution: Helps you manage and adjust your projects to adapt to your specific work processes and levels of certification.
