

Streamline your project management processes with Prometheus Capital Projects & Portfolio Management. This tool creates full visibility and improves consistency across departments on your long-term projects while bringing the approval process and associated deliverables to a central point of access. From ideation, to work breakdown structure (WBS) buildout, to project approval and execution, Prometheus Capital Projects & Portfolio Management gives you access to the project management organization phases and project deliverable statuses. Capture all your project information in one easy-to-access location.

Key Capabilities

Assign team members to the project tasks and phase-gate deliverables.

Build out your WBS in a user-friendly and intelligent system that connects directly to your EAM or CMMS.

Input or view risk management data to easily evaluate risks, opportunities, and mitigation plans.

Develop and approve capital budgets. Create what-if scenarios to evaluate major budget adjustments and compare with the current budget.

Calculate Schedule Performance (SPI) and Cost Performance (CPI) earned value metrics to determine project trends.

Build and take baseline snapshots of your project forecast from the Estimate at Completion (EAC) to Estimation to Completion (ETC) leveraging actual and committed costs in real-time.

Capture all your project information in one easy-to-access location.

Advantages

- Streamline the project approval process between departments while maintaining strict controls.
- Centrally capture key-project deliverables in a consistent format.
- Gain visibility to the whole portfolio of projects in your company.
- Avoid inaccurate budgets, estimates, forecasts, deadlines and reporting between teams.
- Smoothly transition between stage gates.
- Identify risks and opportunities with an easy-to-use management tool.
