

A purpose-built solution for maintenance, Warranty Tracker delivers actionable intelligence to track and claim your warrantable repairs.

Prometheus Warranty Tracker for SAP is fully integrated with SAP and allows you to track warranties and automatically present vendor claims for review and potential reimbursement.

A successful warranty claim is one of the easiest ways to contribute hard dollar savings directly to your company's bottom line and to ensure budget targets are achieved. Even better, companies can increase production uptime, improve equipment design, and strengthen their supplier relationships.

Key Capabilities

Tracks warranty status of functional location, equipment, and/or material.

Documents warranty duration by calendar or by consumption (mileage, hours in service, etc.)

Reviews maintenance work orders against warranty status.

Creates vendor claims for warranty reimbursement.

Allows for flexible process flow designed to easily accommodate your company's unique needs.

Tracks reimbursement of claims and improves visibility.

A successful warranty claim is one of the **easiest** ways to contribute hard dollar savings.

Advantages

- Improve asset performance since warranty claims often lead to re-designs or may prevent future warranty claims.
- Recover or avoid maintenance costs by ensuring that in-warranty repairs are filed with the vendor for reimbursement.
- Achieve budget targets for maintenance with improved visibility and tracking.
- Use historical claims records for future vendor negotiations and selections.

The Warranty Tracker module integrates seamlessly with SAP, giving you total insight and control over all your warranty work and claims.
