

Prometheus ePAS Configuration Tools help you achieve operational excellence with configuration options designed to match and compliment your business processes. The tools allow you to configure documents, forms, workflows, views, dashboards, tags, risk matrices, hazards, site maps, and languages.

## Key Capabilities

Enhance employee safety by facilitating change and managing safety measures for your entire environmental health and safety process.

Utilize the performance power of Prometheus ePAS software whilst still implementing your existing procedures, ensuring a smooth transition.

Configure business processes centrally, and then immediately deploy to mobile devices.

Built-in tools allow you to further configure your system after implementation as your business matures and evolves.

Achieve competitive advantage with configuration options designed to match and compliment your business processes.

## Advantages

- Flexible and fully configurable to suit industry-specific functionality and individual specific requirements.
- Standardize processes across all sites and units, while still allowing each site to use its established terminology.
- Facilitates management of change and the evolution of the business.
