Prometheus Planning & Scheduling
for Maximo

PROMETHEUS GROUP

The Prometheus Planning & Scheduling Suite for Maximo offers an out-of-the-box solution that streamlines maintenance processes and increases the functionality of your Maximo system. The solution includes tools to improve and enhances every stage of the maintenance process, all while keeping a single source of truth within Maximo.

Key Capabilities

Prometheus Web Suite is made up of key modules designed to integrate with each other and with your ERP/CMMS.

Scheduler
Comprehensive, powerful, and easy-to-use planning and scheduling tool that allows for the scheduling and assigning of work, in one easy to use application. The graphical scheduler and intuitive heat map make it easier than ever before to improve the accuracy and efficiency of your planning and scheduling process, without negatively affecting your Maximo system performance.

Preventative Maintenance
View and manage Preventive Maintenance data while visualizing your PM Forecast in an easy-to-understand Gantt. Modify individual PM Forecasted items, thus alleviating over/under allocation of resources before Work Orders are ever generated. Utilize the interactive histogram to view workload by multiple parameters.

Job Plan
Configurable, detailed views of your Maximo Job Plans allow you to interactively analyze historical transactions with auto-calculated statistics to quickly determine where duration and timing changes will increase scheduling accuracy. Multi-revision and mass change of Job Plans will decrease time consuming repetitive actions.

Shift Updater
Graphical interface that provides insight into resource calendars, availability and summarization grouping by any data element. Manage resource availability for one or multiple resources with a single click.

Advantages

- Drives increased wrench time and resource utilization.

- Easily identifies under/over allocation of resources through an intuitive heat map.

- Reduction in scheduling conflicts, costs, reactive work and downtime.

- Reduce effort required to produce a schedule.

- Schedule work with exclusive one-click scheduling functionality.
