

Mobility Improvements Within Mining at EVRAZ

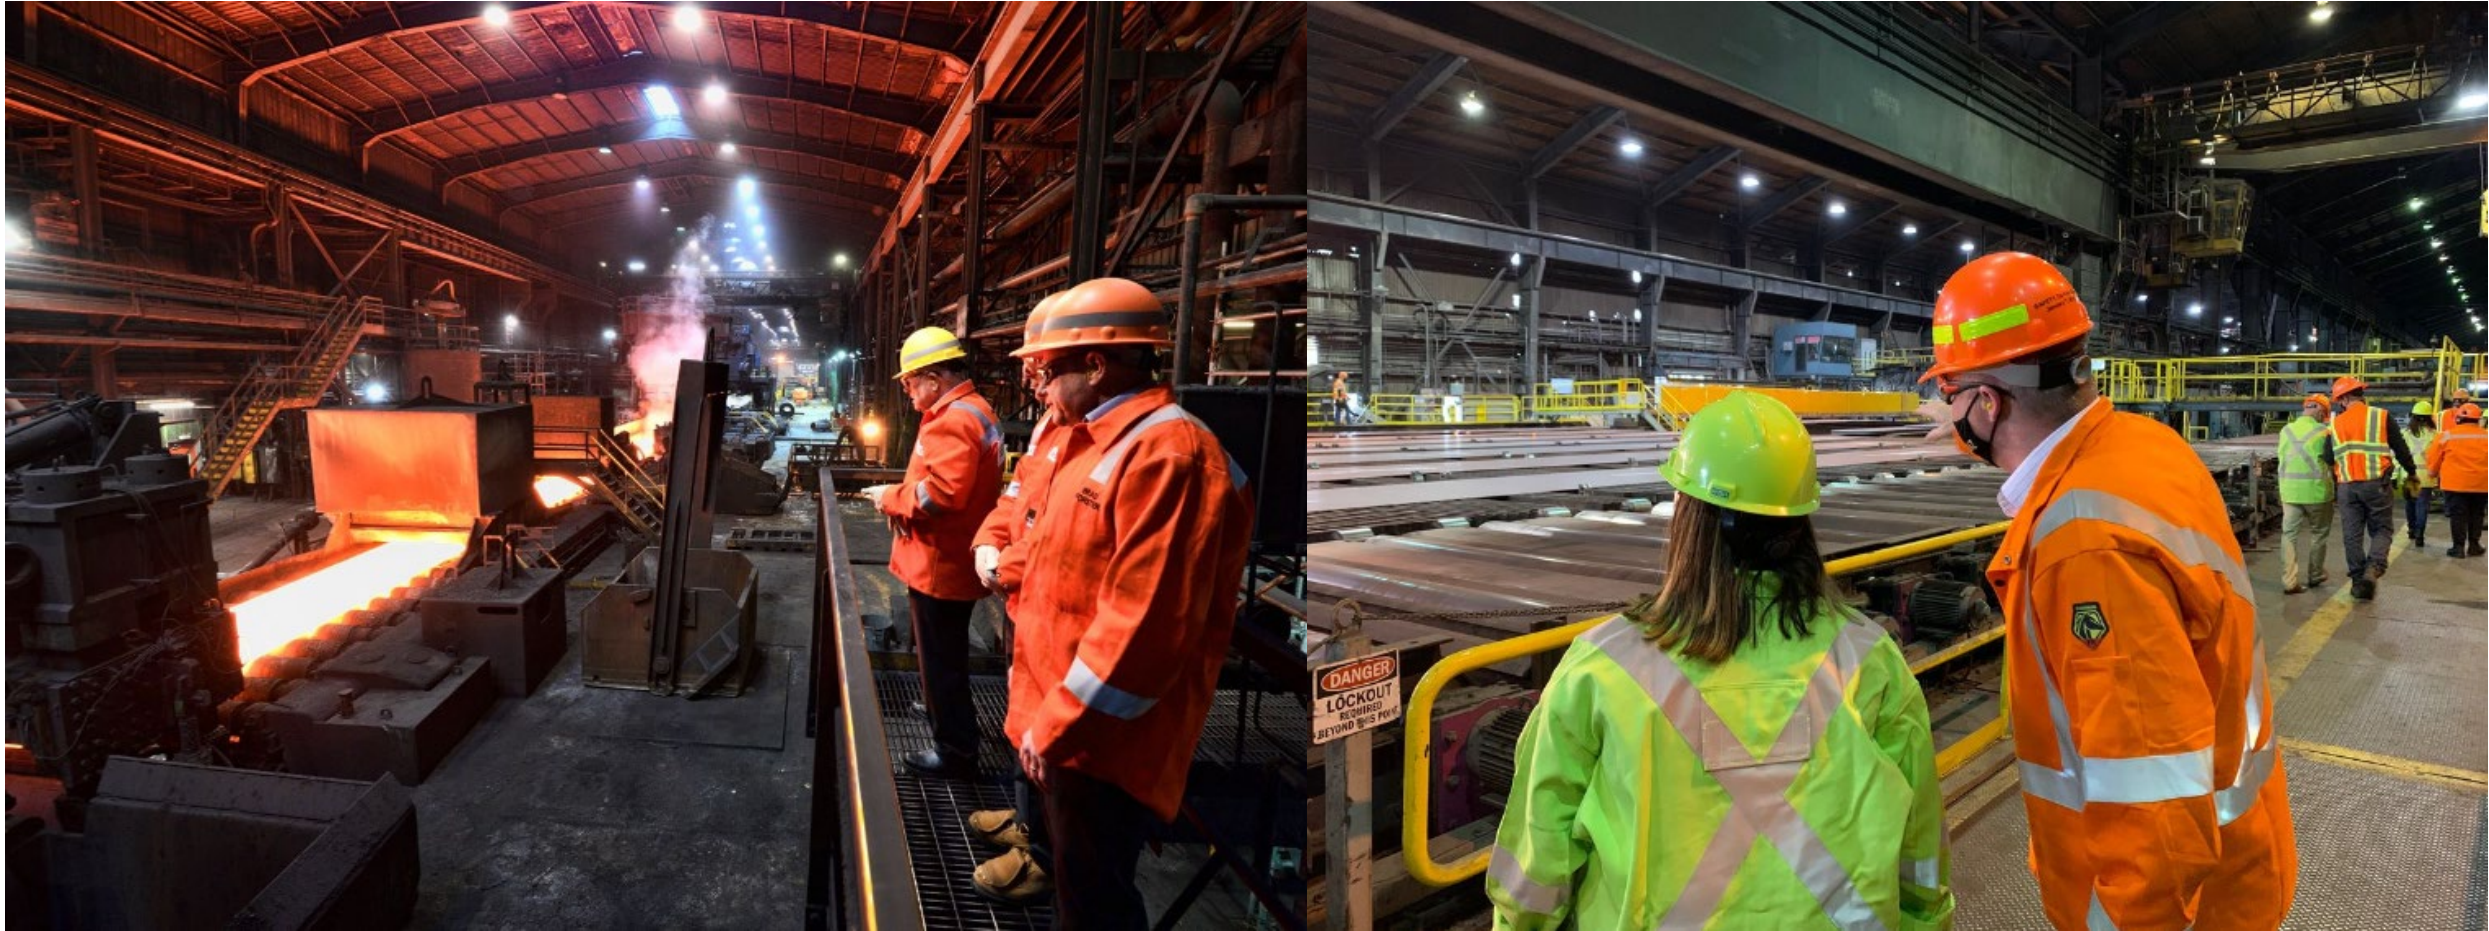

Steve Heavyside

April 18, 2023

EVRAZ - Overview

- **EVRAZ** is a vertically integrated steel, mining and vanadium business with global operations
- EVRAZ North America is one of the most diversified steel manufacturers in North America.
- Leading producer of engineered steel products for rail, energy and industrial end markets

EVRAZ North America Operations

Maintenance Challenge

- Using Oracle ERP company-wide
- Have Oracle eAM for maintenance but was not being utilized
- Very low adoption and usage, resulting in low value and organizational benefit
- Workarounds and alternatives used, inefficient process with limited visibility

The Right Tools for the Job

- Maintenance understands the need for the right tools
- Needed to be easy to use and intuitive
- Could not get there with eAM alone
- Prometheus Mobile for Oracle eAM seemed to offer the best option

Mobile Requirements

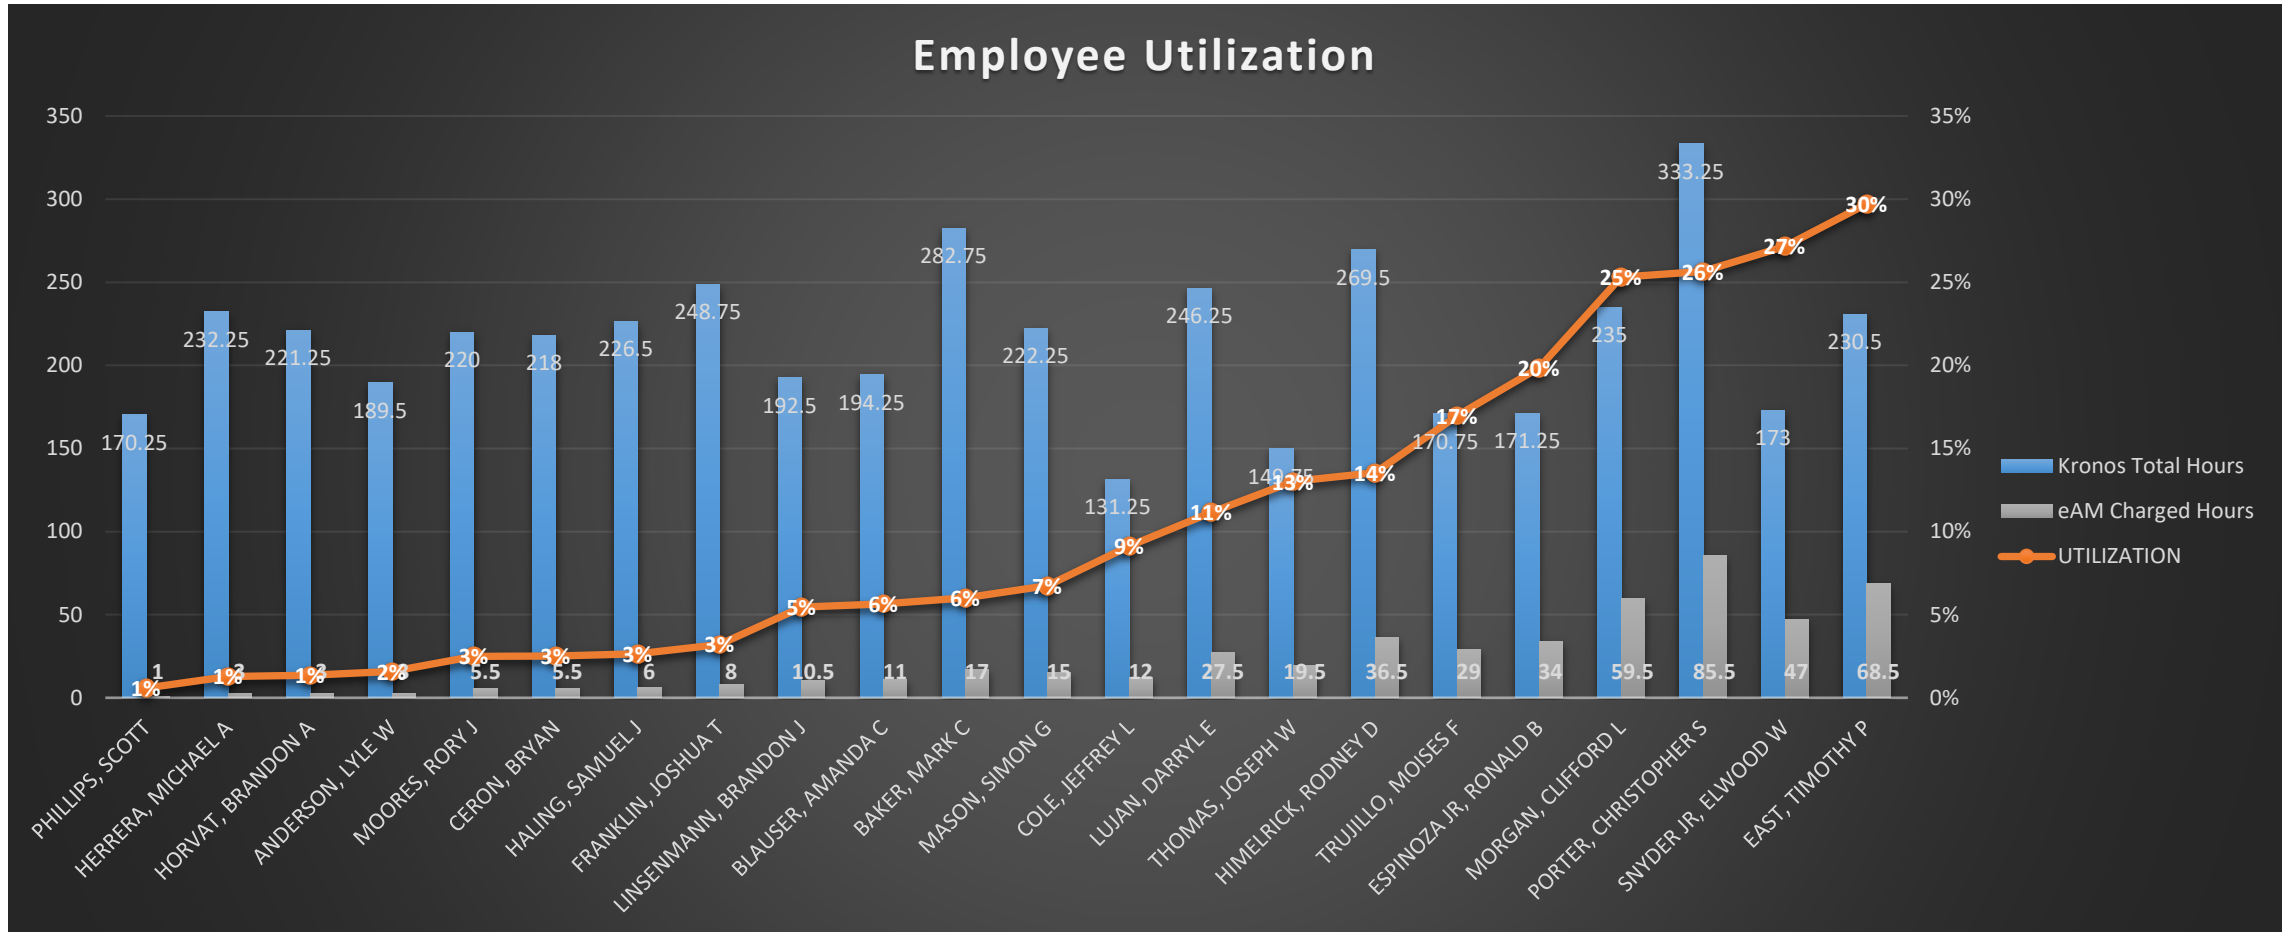

Had specific needs but overall kept it very simple:

1. Needs to be easy to use and adopted
2. Needs to implement fast
3. Needs to be connected to Oracle eAM and drive utilization

Prometheus Mobile for Oracle

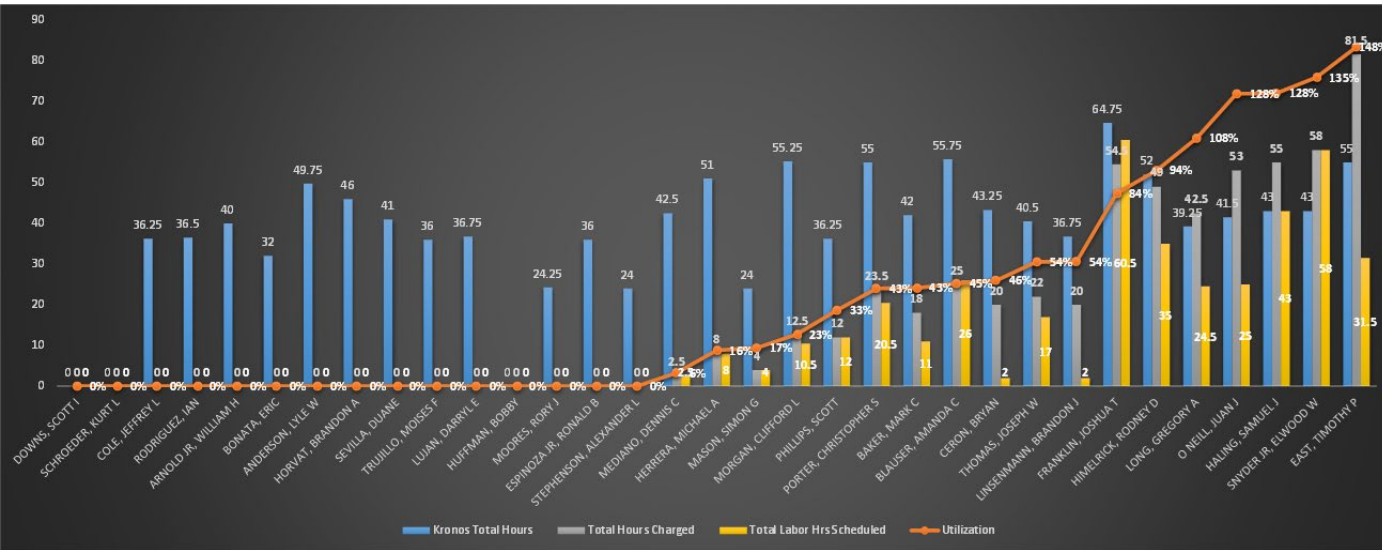

- Checked all the boxes for functionality
- We implemented and were live in 3 months
- Almost immediate improvement in Oracle eAM utilization
- Starting to get organizational benefit and insight into maintenance and driving improvements

EAM Utilization
