PROMETHEUS GROUP USER CONFERENCE

What's New With Oracle Cloud Prometheus Solutions Jonathan Addison – Sr. Functional Consultant Sean Matteson – Director of Professional Services

Agenda

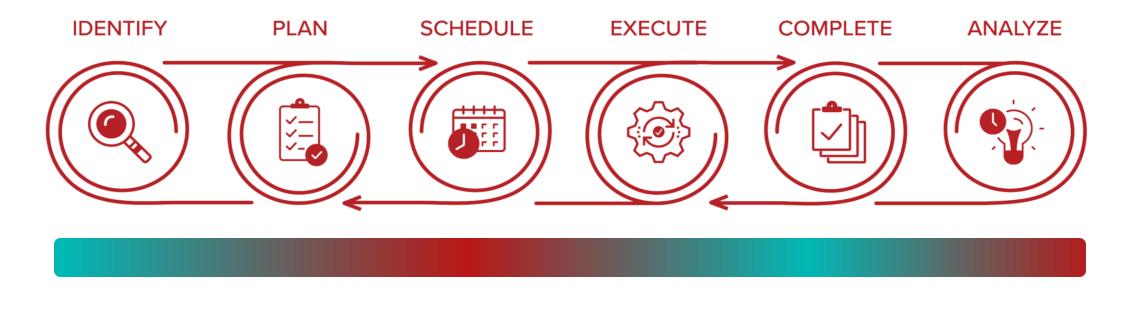

- New Development
- What's Next

Scheduling

Planning & Scheduling and Mobility In the Maintenance Lifecycle

Common Scheduling Pains

- Excel or spreadsheet based
- No easy way to communicate to mechanics

- Paper based resource calendar
- Calendar maintained in excel

Cannot track scheduling metrics

- No data
- Too many databases

Poor Job Plans

- Inaccurate/poor plans make scheduling inaccurate
- Difficult to adjust
- No data to make educated decisions

°; °

No Scheduling Standard

- All Schedulers have their own method
- Scheduling is generally an afterthought

Universal Web Scheduler

- Cloud Hosted
- Real Time Integration
- One-Screen for all functions
- Modernized UI with Improved UX
- Connect to Oracle Fusion, SAP, JDE, & Maximo

Web Scheduler

- Intuitive UI
- Inline editing of data
- Mass edit Work Orders and Operations
- Configurable display settings
- Mass Assign capabilities
- View Data Constraints

Shift Updater

- Streamlines user input of exceptions (e.g., Vac, Sick, Work, Extra Time)
- Allows visual overview of shifts, shift patterns and exceptions
- Apply to many users at once
- Directly impacts
 Scheduler availability

Mobility

Prometheus Mobile for Oracle Overview

Work Management

Electronic access to work order information. Easily create, update, and submit data from the field and from a single screen.

Inventory Management

Have complete control of your warehouse with one-step goods issue, receipts, cycle counts via bar coding scanning or key work searching.

ſ	
	=
L	-2

Asset Management

View routes, inspections, and reading histories. Record meter readings and upload directly to Oracle.

Enhancing Legacy WorkAlign

- Moving from native app to a universal platform
- Modernized UI
- Compatible with EAM and Fusion

What's New – Migration to OMX Complete

Prometheus Oracle EAM Mobile Solution

2022

Research and Development

- New features/modules:
 - 2 Step Receiving
 - WO History cross-org
 - Quality Plans read
- Complete functional migration from legacy products
- Unified UI/UX (on-prem)
- App navigation and query optimization
- Oracle Permitting solution
- Xamarin Forms upgrades, Sync Fusion upgrades
- VPP support (Apples' Volume Purchase Program)

Certifications

• Certify with Oracle EBS 12.2.11, Oracle Database 21c

2023

Research and Development

- New features/modules:
 - Unified UI for PG Mobile product (Cloud)
 - Asset Operation Log
 - Express Work Orders
 - Digital Check sheet functionality
 - Additional Integrated Scheduler features
- Single sign-on (SSO) support for additional providers
- Xamarin Forms upgrades, Sync Fusion upgrades

Certifications

- Certify with Oracle EBS 12.2.12, Oracle Database 22c
- Certify with Oracle Cloud Fusion

Research and Development

Beyond

- New features/modules:
 - IIoT connectivity
 - Notifications engine
 - Dashboards/trends

Certifications

• Certify with latest Oracle EBS, Oracle Cloud, Oracle Database

Thank you
