

# Why Maintenance Planning and Scheduling Should be a Key Organizational Initiative

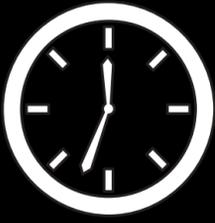

Without Proper Planning & Scheduling

Only **35%** Wrench-On Time

## Benefits of Investing in Proper Planning & Scheduling

**65%** Wrench-On Time

Increase wrench time from 35% to 65% From 2.8 to 5.2 hours of actual work/8 hour shift

Eliminate 10% of spare parts required

Reduce current staff's backlog of work orders

Efficient repairs and plant back online in less time

From reactive maintenance to preventive and reliability focused maintenance

## MAINTENANCE EXCELLENCE

Having an effective maintenance strategy that eliminates non-value added activities, maximizes condition based maintenance, and focuses resources on the most critical assets is of vital importance. Doing the right jobs, with the right parts, at the right time is essential.
