

Prometheus eLearning helps organizations maximize return on investment by preparing employees prior to implementation and supporting continuing education requirements after implementation. Prometheus Group solutions are used globally to improve the maintenance and operations groups within companies. Learning to use the software effectively helps you stay competitive.

Interactive software simulations give users guided hands-on experiences with the solutions as they work through the course. After the module is complete, the acquired knowledge can be tested with progress quizzes and live feedback. By completing assignments and answering theory questions, employees gain relevant experience that translates to real world applications.

Advantages

- Learn how our solutions can improve your organization’s workflows and practices
- Students are able to access modules any time, or anywhere, all online
- Real-world software learning environment
- Multiple languages are supported
- Phone and email support available
- A badge is provided after successfully completing the course
- Bookmark courses as you go to work on your own time
- Courses contain an interactive lesson, training guide, and quiz
