

PM 102: World-Class Maintenance Scheduling with SAP and Prometheus

Prometheus Group University is a series of three-day training courses developed to help our customers get the most out of their SAP system and Prometheus products.

PM 102 covers advanced end-to-end scheduling best practices in SAP using Prometheus ERP Advanced. Across this detailed and interactive training course, attendees will learn how to maximize their usage of SAP PM, focusing on the following areas: establishing standardized selections and reports within Scheduler, streamlined navigation based on process, building effective weekly execution schedules in a repeatable fashion, and using KPIs to monitor progress and benchmark performance. This course is a prime opportunity to better understand the tools within ERP Advanced and SAP to become more effective in the scheduling role.

PM 102 is recommended for anyone currently using, or planning to use, ERP Advanced for weekly maintenance scheduling.

About PGU

- Learn about industry best practices
- Network with your peers
- Adds functionality to standard SAP
- Complete class exercises live in standard SAP

Each course includes:

- Access to practice system during and upon completion of the course
