

STO Manager

Are you using multiple systems to support the complex requirements of your Shutdowns, Turnarounds, and Outages (STOs)? To improve coordination, communication, efficiency, and accountability, STO Manager provides a web-based, single command center to unify and integrate your various systems to optimize your STOs end-to-end.

As part of the integrated, scalable Prometheus Platform, STO Manager connects your STO processes to your overall asset management solution.

Integrated Solution

- One platform web-based solution to integrate all other systems
- Fast, reliable digital approvals and status updates
- Configurable user management, simplified system ideal for short-term contractors
- Leverage data from ERP
- Real-time progress updates collected in the field
- Improve accountability for scope management

We partner with SAP and IBM to ensure the product is continuously compatible with SAP and Maximo.

Key Benefits

Scope Management - Robust, configurable approval for generating and managing STO scope. Integrates with your ERP system to convert routine work into STO work.

Planning Progress Tracking - Transform your turnaround planning from “gut feeling” to data-driven. Know that your plant is ready for your upcoming STO.

Materials Management - Request, approve, and track materials for your STO. Integrates with your ERP system to provide real-time statuses.

Inspection Planning and Execution - Prepare for inspection jobs and be ready to handle “discovered” work.

QA/QC Packages - Minimize production system downtime by building and tracking QA/QC package completion.

Work Execution with Syntempo - Allow contractors to update and progress your STO schedule from contractor access to maintain data-integrity.
