Prometheus Contractor Management Suite

PROMETHEUS GROUP

The Prometheus Contractor Management Suite has been specifically designed for enterprise users. It seamlessly integrates time and attendance recording, labor allocation, onboarding, contractor cost tracking, and advanced analytics with your ERP, EAM, or CMMS.

Key Capabilities

The Prometheus Contractor Management Suite uses four core modules to give you complete control and insight into productivity-related issues. The solution is available as an add-on for both Prometheus STO Planner and Prometheus Planning & Scheduling, and offers seamless integration with your EAM, ERP, or CMMS.

Contractor Cost Tracking
Capture, validate, and manage all time and cost data related to contractors, as well as streamline review, approval, and payment processes.

Contractor Management
Streamline contractor management tasks like creating new vendors, setting approval workflows, and viewing history of transactions.

Contractor Job Planning
Generate daily job reports and jobs to contractors, create daily projections, and view discrepancies between projections and details entered.

Contractor Onboarding
Manage your contractor onboarding in one place and ensure you have record of contractor insurances and qualifications before they begin performing work.

Gate Reconciliation
Sync gate information with contractor management system, flag incorrect times, and correct inaccurate time easily.

Job Bidding
View and accept contractor bids, manage requests for quotes, and manage vendor acceptance.

Resource Qualifications
Document contractor information like contractor profiles, contractor performance metrics, and contractor qualifications.

Advantages

- Fully integrated with your enterprise systems and other Prometheus Group products.

- Keeps your maintenance projects on-track and on-budget.

- Manages shift assignments and leave assignments.

- Reduces data collection costs.

- Mobile data entry client available.

- Easily configures display screens and business rules.
