

The Prometheus Reporting & Analytics module delivers intuitive, role-based, scalable business intelligence. The solution extracts real-time asset data from any system or database like SAP, IBM Maximo, Oracle, and ABB, and creates visual, interactive data that can be configured into many user-based layouts across individual sites or at the enterprise level. Your dedicated Prometheus data analyst partners with your organization to track progress on sites, corporate-wide initiatives, continuous improvement, reliability, costs, and more.

Gain deeper understanding of your data through custom maintenance reports and calculations. Using this data, determine how to source the required information from your maintenance system. In addition, we support many reports out-of-the-box.

## Key Capabilities

The Prometheus Reporting & Analytics module is comprised of five core modules that provide unprecedented insight into your asset and maintenance data.

### Reliability Metrics

Analyze industry standard reliability metrics to minimize equipment failures and maximize availability.

### Critical Metrics

Follow and assess metrics critical to the success of your preventive maintenance strategy and workflows.

### Key Improvement Metrics

Monitor key changes over weeks, months, or years by tracking core business KPIs.

### Core Work Management Metrics

Increase visibility into your work order management process through customized maintenance management reports.

### Master Data Management

Gain actionable insights about your master data with Master Data-as-a-Service (MDaaS).

## Advantages

- Integration with all solutions on the Prometheus Platform.
- Holistic view of individual, team, and department progress.
- Data-driven decision-making helps improve maintenance or operations work outcomes.
- Easily prioritize work orders, tasks, or repairs based on historical data.
- Measure weekly, monthly, and yearly progress and make adjustments.
- Out-of-the-box reporting and analytics tools configurable to fit your needs.
- Dozens of configurable reports for key tasks and departments.
- Library of maintenance KPIs sourced from industry best practices.
