The Prometheus Platform

The Prometheus Journey

1. Client Configurable

- Full control over application
- Create specific user screens
- Streamline:
 - What a tech sees
 - What a tech has access to
 - What a tech needs to complete
- Configure work order layout

2. Dynamic forms

- Truly eliminate paper
 - Turn virtually any paper form digital
 - Simplify form execution
 - Reduce pencil whipping
- Create a follow-up WO/Request on form
 - Find a problem? Act immediately
 - True work order traceability
 - Improve data integrity
- Readings write back to Maximo
 - Meters, Specifications, attachments, etc.

Demonstration

3. Fully Offline Capable

- Ability to cache necessary information to the user's device
 - Work Orders
 - Assets/Locations
 - Attachments
- Seamless transition between online and offline states
- All modules fully available in either state

4. Work Order Execution

- All Maximo fields available
- Play button for WO start/travel time
- Attachments/Picture Editing
- Part search and barcode scanning

5. GIS Integration

- Maps available offline
- Ability to assign work based on tech location
- All GIS mapping layers available
 - Easily toggle between layers
- Create assets in Maximo or GIS system
- Integrates with GIS System
