

Productivity Suite

Integrated Employee Time Recording, Contractor Cost Tracking, Overtime Management, and Leave and Fatigue Management for enterprise users.

Software Functions

Fully Integrated with Your Existing Enterprise System

The WorkTech Productivity Suite has been specifically designed for enterprise users. It seamlessly integrates time and attendance recording, labor allocation, overtime management, leave management, fatigue management, contractor cost tracking and advanced analytics with your MAXIMO®, SAP®, or Oracle® maintenance management data.

Product Benefits

- Fully integrated with your enterprise systems
- Accurate and easy to use
- Keeps your maintenance projects on-track and on-budget
- Manages complex overtime, shift assignments and leave assignments
- Highlights worker fatigue issues
- Reduces data collection costs
- Mobile data entry client available!

WorkTech

Accurate and Easy to Use

- **Improve data accuracy.** The software automatically includes work rules, employee qualifications and work order assignments when entering timekeeping data, approving leave requests or scheduling shifts.
- **Automate your labor recording.** Enter and approve actual work assignments by individual, group or crew
- **Easy to configure.** Display screens and business rules are easily changed without advanced programming

Keep your Maintenance Projects On-Track and On-Budget

- **See Real Time Information.** Stop waiting 14-60 days to reconcile time card entries, contractor invoices and billing reports! Managers can immediately review employee and contractor costs in one place, including employee labor, contractor labor, equipment, material and third-party costs.
- **Reconcile Contractor Charges.** Easily verify contractor invoices against actual labor and material charges, including allowed overages.
- **Advanced Analytics.** Costs can be grouped by work order, purchase order, project or contractor. Use your personal dashboard to monitor your most important performance measures.

Highlight Worker Fatigue Issues

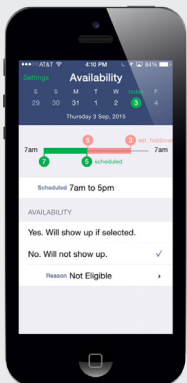

- **Identify Fatigue Problems in Advance.** Proactively identifies employees at risk of excessive fatigue and accidents.
- **Use Employee Fatigue Ratings to Assign Employees to Jobs.** Identify the best employees—by skill and level of fatigue—to work open or non-scheduled shifts.
- **Ensure Regulatory Compliance.** Ensure compliance with Recommended Practices 755 and other guidelines for worker fatigue.

Manage Complex Overtime, Crew Assignments and Leave Management

- **Overtime Management.** Identify the best workers for overtime assignments, using employee skills, shift schedules, union rules, location and prior work hours.
- **Flexible Crew Assignments.** Supports short-term employee shift & crew changes using a simple “drag and drop” interface.
- **Leave Management.** Automatically process employee leave requests, based upon accrued leave and skill coverage requirements.
- **Can be used for both company employees and contractors.**

Reduce Data Collection Costs

- **Seamless integration with enterprise data.** Personnel, work shift, work order, job plan and project data from ERP/EAM software is visible in the WorkTech Productivity Suite.
- **Integrates with other systems.** Data from the WorkTech Productivity Suite can be transferred to other enterprise systems, such as Lenel gate control systems, Oracle/PeopleSoft and SAP software systems.
- **Consolidate multiple sites into a single system.** Consolidate multiple sites into a single centralized system using the web-based software. Each location or division can operate with different rules within a single WorkTech database.
- **Reduce data collection costs by up to 90%.**

NOW AVAILABLE! MOBILE DATA ENTRY

(for iOS and Android platforms)

- Time entry
- Time Approvals
- Geolocation
- Overtime Availability

WorkTech has been supplying solutions to enterprise customers for over 20 years. WorkTech's Productivity Suite is in use by over 100,000 workers worldwide.
