How Can Risk Assessments Affect Permitting?

- Risk assessments are consistently involved with work permitting

- Certain jobs always require a risk assessment in addition to a work permit

- Risk assessments change how the permit should be written

- Review of risk assessments should affect future permits

- Consistency is key, and difficult to achieve on paper

Isolations and LOTO Processes

- Where are Isolation Procedures stored?

- How are they managed?

- What happens when the plant changes?

- What interlocks are in place with work permitting?
